

Project Workflow: Week 4

Phase: Core

1. Objective

The primary goal of Week 4 was to build the main game window for the Treasure Hunt game. This included:

- Developing the main game window and game panel..
- Implementing the base game loop for continuous updates.
- Applying a base visual theme for the game interface.
-

2. Detailed Task Breakdown

Main Game Window

Developed the main game window and created the primary game panel using JPanel.

Game Loop Implementation

Set up the core game loop using a Swing Timer to continuously update and repaint the game panel at a fixed interval, forming the foundation for animation and real-time gameplay.

Base Styling & Theme

Applied a base color theme and font styling to the game window and panel. Background colors, text styling, and basic visual consistency were configured to match the treasure hunt/island theme.

3. Deliverables

- **Main Game Window:** Fully developed Java Swing game window (JFrame).
- **Game Panel:** Functional JPanel prepared..
- **Game Loop:** Timer-based game loop added for continuous updates.
- **Base Theme:** Basic colors, fonts, and visual styling applied.

4. Tools & Resources

Development Environment

- Java JDK 17 (or 11+)
- IntelliJ IDEA / VS Code

Libraries & Technologies

- Java Swing
- Java AWT
- JFrame
- JPanel
